Language : English

Text-to-Speech: Enabled

Print length : 320 pages

As climate change intensifies, millions of Americans will be forced to migrate. This unprecedented movement will have a profound impact on our nation, and it is essential that we begin to prepare for it now.

In *Climate Change and the Next American Migration*, renowned climate scientist Dr. Katharine Hayhoe and sociologist Dr. Robin Bronen offer a comprehensive look at the challenges and opportunities of this unprecedented movement. They explore the science behind climate change, the impacts it is already having on our communities, and the ways in which we can adapt and relocate in a just and sustainable way.

Hayhoe and Bronen argue that climate change is not just an environmental issue; it is a human issue. As more and more people are forced to leave their homes due to rising sea levels, extreme weather events, and other

climate-related disasters, we must find ways to welcome them into our communities and help them rebuild their lives.

Climate Change and the Next American Migration is a must-read for anyone who cares about the future of our nation. It is a timely and urgent call to action, and it offers hope for a more just and sustainable future.

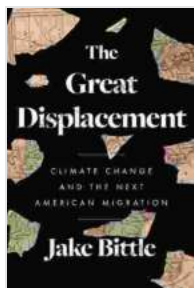

Here are just a few of the things you will learn in this book:

- The science behind climate change and its impacts on the United States
- The ways in which climate change is already forcing Americans to migrate
- The challenges and opportunities of climate-related migration
- How we can adapt and relocate in a just and sustainable way

If you are concerned about the future of our nation, then you need to read *Climate Change and the Next American Migration*. It is a book that will change the way you think about climate change and its impacts on our country.
