The story unfolds in a future where scientists have achieved an extraordinary breakthrough. However, this scientific marvel comes at a profound cost. Parallel Earth, it turns out, is inhabited by a race of alien beings known as the "Laterals." These beings, imbued with immense wisdom and technology, possess the ability to manipulate time and space. As the scientists on Earth drain

Parallel Earth of its resources, they inadvertently trigger a series of unexpected and far-reaching consequences.

The Laterals, outraged by the exploitation of their planet, seek retribution. They dispatch a group of agents to Earth with a mission to sow discord and chaos among the unsuspecting humans. The ensuing conflict pits the forces of rationalism and scientific progress against the realm of the supernatural and the unknown.
