

Essential Surgery: A Vital Resource for Improving Surgical Care Worldwide

Surgery plays a critical role in global health, addressing a vast array of conditions that affect millions of people. However, access to safe and timely surgical care remains a significant challenge in many low- and middle-income countries.

The third edition of Disease Control Priorities (DCP3), a landmark publication from the World Health Organization (WHO), includes a comprehensive volume dedicated to Essential Surgery. This volume provides a roadmap for strengthening surgical systems, improving surgical outcomes, and reducing surgical disparities worldwide.

A Comprehensive Blueprint for Surgical Care

The Essential Surgery volume of DCP3 is a comprehensive guide that covers the following key areas:

- **Surgical Services:** Discusses the essential surgical services that should be available to all populations, including emergency and elective surgery, trauma care, and cancer surgery.
- **Surgical Workforce:** Examines the need for an adequate surgical workforce, including surgeons, nurses, and other healthcare professionals.
- **Surgical Infrastructure:** Highlights the infrastructure requirements for safe and effective surgical care, such as operating rooms, equipment, and supplies.
- **Surgical Technology:** Reviews the latest surgical technologies and their potential to improve surgical outcomes.
- **Surgical Policy:** Explores policies that promote access to essential surgery, including financing, insurance, and regulation.

The volume also includes country case studies that demonstrate how essential surgery interventions have improved surgical care and health outcomes in various settings.

Empowering Surgical Care Providers

The Essential Surgery volume of DCP3 is an essential resource for surgical care providers worldwide. It provides evidence-based guidance on how to improve surgical services, train surgical personnel, and optimize surgical infrastructure. The volume also includes a wealth of practical tools, such as surgical checklists, protocols, and assessment tools.

Reducing Surgical Disparities

Essential Surgery is committed to reducing surgical disparities and improving access to surgical care for all. The volume includes strategies for addressing the specific needs of vulnerable populations, such as women, children, the elderly, and those living in rural areas. It also emphasizes the importance of collaboration and partnerships between healthcare professionals, policymakers, and community organizations.

Promoting Sustainable Surgical Systems

The Essential Surgery volume of DCP3 recognizes the need for sustainable surgical systems that can provide high-quality surgical care over the long term. The volume discusses strategies for building resilient surgical systems, strengthening health information systems, and improving surgical outcomes through research and innovation.

The Essential Surgery volume of DCP3 is a comprehensive resource that provides a roadmap for strengthening surgical systems and improving surgical outcomes worldwide. It is an essential tool for surgical care providers, policymakers, and anyone committed to improving global health.

By empowering surgical care providers and reducing surgical disparities, Essential Surgery is helping to ensure that all people have access to the surgical care they need to live healthy and productive lives.

Call to Action: Download the Essential Surgery volume of DCP3 today and join the movement to improve surgical care worldwide.
