For over two decades, the Evidence Based Clinical Chinese Medicine (EBCCM) series has been the leading source of evidence-based research on the efficacy and safety of Chinese medicine. This groundbreaking series has changed the way that Chinese medicine is practiced and perceived worldwide.

EBCCM Volume 10 is the latest installment in this essential series. This volume focuses on the use of Chinese medicine for the treatment of common chronic diseases, such as cardiovascular disease, diabetes, and cancer. The research presented in this volume provides strong evidence for the effectiveness of Chinese medicine in the treatment of these conditions.

For example, one study published in EBCCM Volume 10 found that Chinese herbal medicine was effective in reducing blood pressure and cholesterol levels in patients with cardiovascular disease. Another study found that Chinese acupuncture was effective in improving blood sugar control in patients with diabetes. And a third study found that Chinese medicine was effective in reducing the risk of cancer recurrence in patients who had undergone surgery.

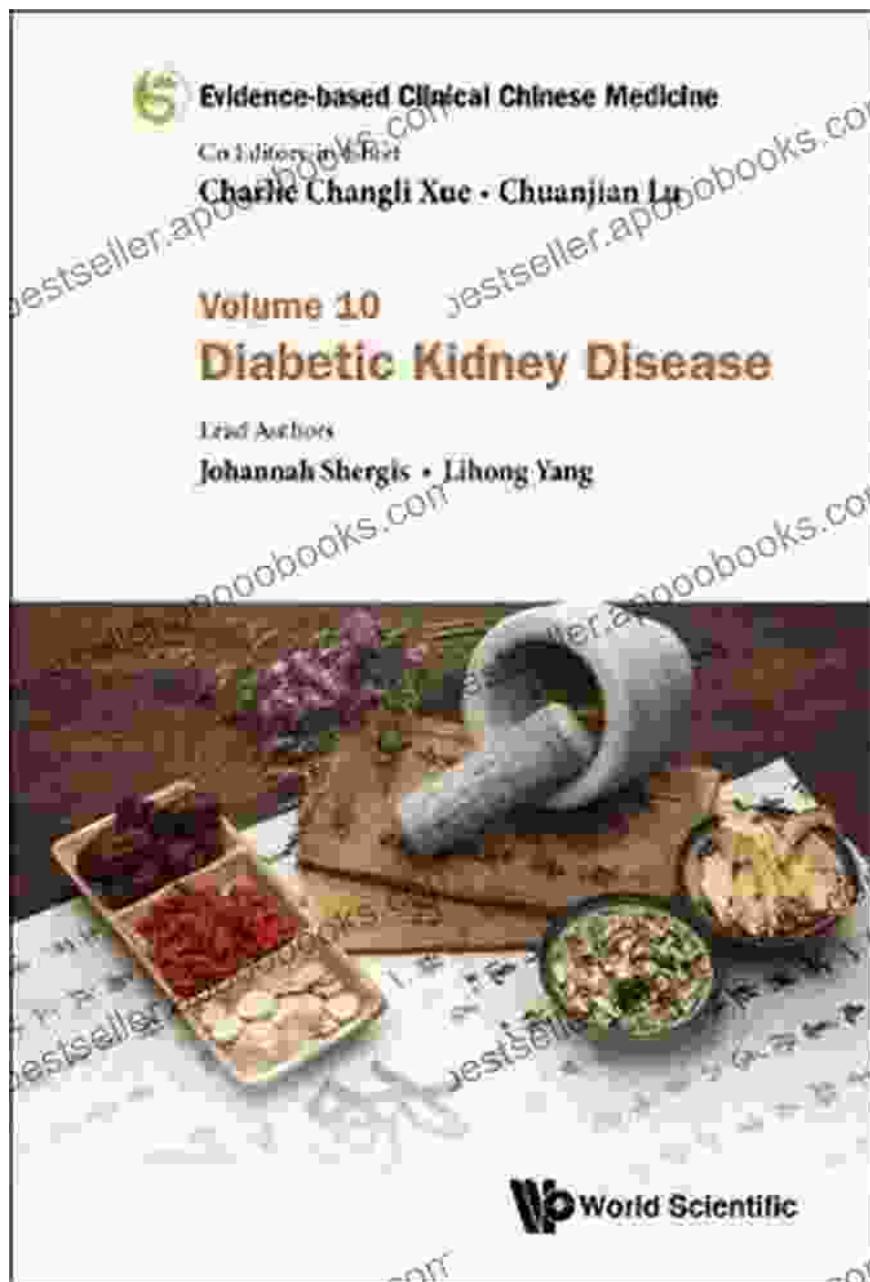

The research presented in EBCCM Volume 10 is essential reading for anyone who is interested in the use of Chinese medicine for the treatment of chronic diseases. This volume provides strong evidence for the effectiveness of Chinese medicine in the treatment of these conditions, and it offers valuable insights into the mechanisms by which Chinese medicine works.
