This guide will provide you with everything you need to know about caring for your cockatiel, from choosing the right cage and diet to providing them with proper socialization and enrichment.

### Choosing the Right Cage

The first step in caring for your cockatiel is choosing the right cage. The cage should be spacious enough for your bird to move around comfortably, but not so large that they feel overwhelmed. A good rule of thumb is to

choose a cage that is at least 18 inches long, 18 inches wide, and 24 inches high.

The cage should also be made of durable materials that can withstand your bird's chewing and climbing. Avoid cages with sharp edges or exposed wires, as these can injure your bird.

## **Diet**

Cockatiels are omnivores, and their diet should include a variety of foods, including:

\* Pellets: Pellets are a good source of essential nutrients, and they should make up the majority of your bird's diet. \* Seeds: Seeds are a good source of protein and fat, but they should be fed in moderation. \* Fruits: Fruits are a good source of vitamins and minerals, and they can be offered to your bird as treats. \* Vegetables: Vegetables are a good source of vitamins, minerals, and fiber, and they can be offered to your bird as treats.

It is important to provide your cockatiel with a fresh supply of water every day.

## **Housing**

In addition to a cage, your cockatiel will need a place to sleep, play, and bathe. You can provide your bird with a variety of toys to keep them entertained, such as:

\* Perches: Perches are essential for your bird's physical and mental health. They provide a place for your bird to rest, sleep, and play. \* Toys: Toys are a great way to keep your bird entertained and stimulated. There are a

variety of toys available, such as bells, mirrors, and ladders. \* Bath: Cockatiels love to bathe, and you should provide them with a shallow dish of water to bathe in.

## **Health**

Cockatiels are generally healthy birds, but they can be susceptible to a variety of health problems, such as:

\* Feather plucking: Feather plucking is a sign of stress or boredom. It can be treated by providing your bird with more attention and enrichment. \* Respiratory infections: Respiratory infections are common in cockatiels, and they can be caused by a variety of factors, such as stress, exposure to cold or drafts, and poor nutrition. \* Proventricular dilatation disease (PDD): PDD is a fatal disease that affects the digestive system. It is caused by a virus, and there is no cure.

It is important to take your cockatiel to the vet for regular checkups to ensure that they are healthy.

## **Behavior**

Cockatiels are social birds, and they enjoy spending time with their owners. They are also very intelligent, and they can learn a variety of tricks.

It is important to socialize your cockatiel from a young age. This will help them to become comfortable with people and other animals. You can socialize your bird by talking to them, handling them, and playing with them.

Cockatiels can also be trained to perform a variety of tricks, such as talking, singing, and dancing. Training your bird is a great way to bond with them and provide them with mental stimulation.

Caring for a cockatiel can be a rewarding experience. By providing your bird with proper care, you can help them to live a long, healthy, and happy life.
