

# Resistant Students Reach Me Before You Teach Me

Every teacher has had to deal with resistant students at some point in their career. These are the students who refuse to participate in class, who argue with the teacher, and who generally make it difficult to create a positive learning environment.

Dealing with resistant students can be challenging, but it is important to remember that these students are not inherently bad. They may be struggling with personal problems, they may not be interested in the subject matter, or they may simply be bored.

Whatever the reason, it is important to approach resistant students with empathy and understanding. The goal is not to punish them, but to help them overcome their resistance and become successful learners.

There are a number of things that teachers can do to help resistant students. First, it is important to build relationships with these students. Get to know them outside of class, and learn about their interests and goals. This will help you to understand their perspective and build rapport.

Second, it is important to be flexible and adaptable in your teaching style. Not all students learn in the same way, so it is important to find a teaching approach that works for each individual student.

Third, it is important to be patient and persistent. It may take time to build relationships with resistant students and help them to overcome their resistance. However, with patience and perseverance, you can reach even the most challenging students.

Here are some specific strategies that you can use to deal with resistant students:

1. **Build Relationships:** Get to know your students outside of class. Learn about their interests and goals. This will help you to understand their perspective and build rapport.
2. **Be Flexible and Adaptable:** Not all students learn in the same way. Find a teaching approach that works for each individual student.
3. **Be Patient and Persistent:** It may take time to build relationships with resistant students and help them to overcome their resistance. However, with patience and perseverance, you can reach even the most challenging students.
4. **Set Clear Expectations:** Let students know what is expected of them in your class. This includes both academic expectations and

behavioral expectations.

5. **Provide Opportunities for Success:** Give students opportunities to experience success in your class. This will help them to build confidence and motivation.
6. **Be Positive and Encouraging:** Create a positive and encouraging learning environment. Let students know that you believe in them and that you are there to support them.

Dealing with resistant students can be challenging, but it is important to remember that these students are not inherently bad. They may be struggling with personal problems, they may not be interested in the subject matter, or they may simply be bored.

Whatever the reason, it is important to approach resistant students with empathy and understanding. The goal is not to punish them, but to help them overcome their resistance and become successful learners.

With patience, perseverance, and the right strategies, you can reach even the most resistant students.
